DETAILED ACTION

The petition filed on June 5th, 2006 has been dismissed for reasons separately mailed on December 8th, 2006, therefore Jackson (US Patent Application Publication 2002/0068973) remains prior art under 35 U.S.C. 102(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 57 is rejected under 35 U.S.C. 102(b) as being clearly anticipated (see Figures 1-7) by Jackson (US Patent Application Publication 2002/0068973).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson (US Patent Application Publication 2002/0068973).

Jackson discloses all of the claimed structure of the current application (see **Figures 1-7**) except for the device being made from a biologically inactive metal (claims 1, 13, 14), biologically inactive non-metal (claims 15, 27, 28), biologically active bone-based material (claims 29, 41, 42), or a non-bone based material (claims 53, 55, 56).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Jackson from a material such as a biologically inactive metal, biologically inactive non-metal, biologically active bone based material, or a biologically active non-bone based material since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

Applicant's arguments filed May 8th, 2006 have been fully considered but they are not persuasive. As explained earlier, applicant's petition for priority has been dismissed. Therefore, the 2002/0068973 reference constitutes prior art.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
